Address: house no 894 dhoke kasmiriyān, 46000, Rawalpindi, Pakistan (Home)

● ABOUT ME

Highly motivated and results-driven Software Engineer with a focus on Full Stack Development, I am passionate about creating innovative solutions and delivering high-quality code to ensure exceptional user experiences. Excellent problem-solving skills with a keen eye for detail. My expertise across PHP, React JS, Laravel, JavaScript, and jQuery, enabling me to efficiently tackle complex challenges and implement robust solutions like CRM, ERP's, E commerce, Geo-spatial Development and 3rd Party Integration SAP and HABALL.

● WORK EXPERIENCE

AI / LLM ENGINEER – PROPMAX.AI – 01/03/2025 – Current – ISLAMABAD, PAKISTAN

- Designed and developed **AI-powered chatbot and voice assistant systems** to automate customer interactions and internal workflows
- Implemented **Retrieval-Augmented Generation (RAG)** pipelines for intelligent querying over CRM, ERP, and enterprise datasets
- Built scalable AI applications using **Python and LangChain**, leveraging **Chains, Agents, Tools, and Memory** for contextual conversations
- Developed **agent-based architectures with function calling and tool integration** to enable dynamic and autonomous task execution
- Engineered advanced prompts using **few-shot learning, system prompts, and structured (JSON) outputs** to ensure high-quality responses
- Optimized LLM systems for **accuracy, latency, and cost efficiency** in production environments
- Designed **multi-step reasoning workflows** to handle complex user queries and business logic
- Implemented **role-based access control (RBAC)** for secure and permission-based AI interactions
- Conducted **evaluation and testing of prompts and LLM outputs** to ensure reliability and consistency
- Integrated AI systems with **databases, backend APIs, and enterprise platforms** for real-time intelligent operations

TECHNICAL TEAM LEAD (PART-TIME) – SIRAFY DIGITAL SOLUTIONS – 01/05/2024 – Current – RAWALPINDI, PAKISTAN

- Led a team of developers in designing and delivering **web and enterprise applications**, ensuring high-quality code and timely delivery
- Managed **task planning, code reviews, and sprint coordination** in an Agile environment
- Provided technical guidance on **architecture, scalability, and best practices** across projects
- Oversaw development of **CRM, ERP, and custom web solutions**, ensuring performance and reliability
- Collaborated with stakeholders to gather requirements and translate them into **technical solutions**
- Mentored junior developers, improving team productivity and code quality

FULLSTACK SOFTWARE ENGINEER – PROPSURE DIGITAL SOLUTIONS – 03/09/2021 – 28/02/2025 – ISLAMABAD, PAKISTAN

- **React Framework Mastery:** Proficient in developing and implementing web applications using the React framework, showcasing expertise in building dynamic and responsive user interfaces.
- **Full-Stack Development Expertise:** Demonstrated the ability to create custom websites utilizing a full stack of technologies, including React, HTML, CSS, and JavaScript, ensuring a modern and engaging user experience.
- **Laravel Backend Proficiency:** Possess expertise in Laravel for backend development, contributing to the creation of robust and secure server-side components to complement React-based front-end applications.
- **Node.js Experience:** Familiarity with Node.js, demonstrating versatility in backend development and contributing to a broader technology stack for diverse project requirements.

- **Scalable Web Solutions:** Leveraged React and related technologies to craft scalable and high-performance web solutions, emphasizing efficiency and optimal user interactions.
- **Database Management:** Designed and maintained databases using MySQL and PostgreSQL, ensuring effective data management and integrity within web applications.
- **API Integration Proficiency** Successfully integrated third-party APIs and web services into applications, enhancing functionality and providing additional features for a richer user experience SAP and Haball Integrations.
- **Agile Collaboration:** Thrived in an Agile Scrum environment, actively participating in sprint planning and daily stand-up meetings, contributing to the iterative development and continuous improvement of the web applications.

FULLSTACK DVELOPER – ORCALO HOLDINGS – 01/06/2022 – 31/07/2023 – RAWALPINDI, PAKISTAN

- **API Design Excellence:** Proven ability in crafting efficient and scalable RESTful APIs, adhering to industry best practices for optimal performance.
- **Swagger Documentation Leadership:** Spearheaded the creation of clear and comprehensive Swagger documentation, enhancing collaboration by providing a unified reference point for developers.
- **Development Process Optimization:** Played a key role in streamlining development processes, ensuring a smooth workflow and improved coordination between front-end and back-end teams.
- **Communication Bridge:** Facilitated seamless communication between different components of web applications by creating standardized Swagger documentation, fostering a shared understanding among stakeholders.
- **Problem-Solving Expertise:** Applied strong problem-solving skills to address challenges in API design and troubleshooting, contributing to the stability and reliability of web applications.

FREELANCE WEB DEVELOPER – FREELANCE – 05/05/2020 – Current – PAKISTAN

- **E-commerce Website Optimization:** Enhanced user experience on the e-commerce website through optimization, secure payment gateway integration, and improved navigation, resulting in notable increases in both sales and user engagement.
- **Invoice System Automation:** Streamlined billing processes by implementing an automated invoice system, reducing errors, and saving clients valuable time, demonstrating efficiency and accuracy.
- **Daily Sales Management System:** Developed a real-time sales management system, enabling data-driven analysis and contributing to revenue growth through informed decision-making.
- **Power BI Dashboards Creation:** Created dynamic Power BI dashboards with complex data visualizations, empowering stakeholders with insights for strategic decision-making across diverse datasets.
- **GIS Projects for Decision Enhancement:** Applied GIS technology for location-based problem-solving, enhancing decision-making processes across various industries, showcasing a multidisciplinary approach to problem-solving.

REACT NATIVE INTERN – GRAANA – 11/08/2021 – 31/10/2021 – RAWALPINDI, PAKISTAN

- Over the course of my internship, I've had the opportunity to work on multiple exciting projects, each offering its unique set of challenges and learning opportunities. These experiences have allowed me to develop a strong foundation in React Native and equipped me with the skills to create diverse mobile applications.

● EDUCATION AND TRAINING

15/02/2019 – 30/11/2021 Rawalpindi, Pakistan

MASTERS IN COMPUTER SCIENCE Barani Institute Of Technology

Computer Programming, Data Structures and Algorithms, Database Management, Operating Systems, Networking and Security, Software Engineering, Machine Learning and AI, Cloud Computing, Cybersecurity, Big Data, Human-Computer Interaction (HCI), Ethics in Computing, Research and Innovation, Soft Skills, Capstone Project.

Website <http://www.biit.edu.pk/>

2015 – 2017 Islamabad, Pakistan

HIGHER SECONDARY SCHOOL CERTIFICATE (ICS) Islamabad College For Boys

Website <https://icb.edu.pk/>

Website <https://icb.edu.pk/>

● LANGUAGE SKILLS

Mother tongue(s): **URDU**

Other language(s):

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken production	Spoken interaction	
ENGLISH	C1	C1	C1	C1	C1

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

● SKILLS

Laravel | SAP Integrations | Haball Integration | HTML PHP CSS JS (leaflets Open layers Google ESRI APIs) | Geospatial: (Geopandas, GDAL, arcpy) | S3 bitbucket | Regression Tests | Load and Stress Testing | Functional and Non Functional Testing | Git (Github / Gitlab) | Git | Atlassian (Bitbucket, Confluence, Jira) | React, Next.js, React Native

Cloud Computing

Elastic search | Geoserver | Unit Testing | BI tools and applications (Amazon AWS)

DBMS/Spatial Databases

SQL Server | MySQL | PostgreSQL/PostGIS

● PROJECTS

Capstone

The capstone project I contributed to is a comprehensive real estate management system that incorporates inventory tracking, booking, installment payments, rental management, buyback transactions, and SAP finance integration.

- My role primarily focused on SAP finance implementation, financial reporting, and booking processes within this multifaceted real estate solution, ensuring efficient and accurate financial operations.

Prop Feasibility

In my feasibility project, I utilized mapping technology to deliver comprehensive information about customer locations, including road networks, schools, brands, mosques, and more. I integrated Geo server to generate interactive layers, allowing users to access distance and time data for various destinations. This approach enhanced decision-making by providing valuable location-based insights and optimizing route planning.

Online Property Verification System(OPVS)

I worked on an online property verification project that generates comprehensive reports, ensuring legal compliance and ownership authenticity. It integrates with databases, conducts encumbrance checks, verifies property documents, and offers a user-friendly interface. Specifically designed for use with the Capital Development Authority (CDA), it streamlines property transactions while maintaining data security and staying up-to-date with regulations.

Chatbot

I also contributed to the development of a chatbot aimed at reducing the workload of our customer support agents. The chatbot effectively handles routine inquiries, offers quick solutions, and directs complex issues to human agents when necessary. This automation not only enhances customer service but also frees up valuable agent time for more complex tasks, ultimately improving efficiency and customer satisfaction.

Propsure Erp

In the Propsure ERP project, we implemented an advanced GIS (Geographic Information System) module that replicated QGIS functionality. This module allowed us to efficiently manage land parcels, dividing and merging plots, and defining property boundaries. Key features included:

Plot Division and Merging: Users could easily subdivide or combine land parcels, enabling flexible property management.

Boundary Definition: Precise boundary delineation tools facilitated accurate property mapping.

Enhanced GIS Capabilities: We integrated powerful GIS capabilities within the ERP system, streamlining land management tasks and ensuring data accuracy.

Efficiency Boost: This functionality significantly improved efficiency in land and property management, reducing manual effort and minimizing errors.
